46263 7590 04/21/2008 SCULLY, SCOTT, MURPHY, & PRESSER, P.C. 400 GARDEN CITY PLAZA SUITE 300 GARDEN CITY, NY 11530			EXAMINER DAO, THUY CHAN	
			ART UNIT 2192	PAPER NUMBER
			MAIL DATE 04/21/2008	DELIVERY MODE PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/714,303	Applicant(s) MCCAIN, BRIAN S.	
	Examiner Thuy Dao	Art Unit 2192	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 February 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-14 is/are pending in the application.
- 4a) Of the above claim(s) 15-20 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-14 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 14 November 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. This action is responsive to the amendment filed on February 1, 2008.
2. Claims 1-14 have been examined.

Response to Amendments

3. Per Applicant's request, claims 1 and 9 have been amended.

Response to Arguments

4. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action

Claim Rejections – 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tompkins (art of record, US Patent No. 6,862,616) in view of US Patent No. 6,832,230 to Zilliacus et al. (art made of record, hereinafter "Zilliacus").

Claim 1:

Tompkins discloses a program storage device and *a method for use by a client host in obtaining software* (e.g., FIG. 1, col.3: 51 – col.4: 65), *comprising:*

establishing a session with a first server host (e.g., col.2: 41-60; col.4: 12-29); *and*

downloading first software from the first server host for use during the session to implement a client side of a first version of a first network application (e.g., col.4: 30-65; col.3: 46 – col.4: 11),

the client side initially not having a functionality for implementing the first network application (e.g., col.2: 41 – col.3: 23);

wherein the first software is compatible with software executed at the first server host to implement a server side of the first version of the first network application (e.g., FIG. 2, col.5: 1-63);

enabling the client host to communicate with a different server that is using a version of the first network application and allowing the client host to download client-side code of the different version of the same first network application from the different server (e.g., col.1: 11-18; col.4: 2-11; FIG. 4, col.6: 18 – col.7: 59),

wherein the client host is allowed to communicate simultaneously with one or more different servers even if the different servers are running different versions of the same first network application (e.g., col.5: 64 – col.6: 17; col.7: 49-59).

Tompkins does not explicitly disclose *enabling the client host to request and download additional code as needed; and implementing at the client host a timer for deleting said first software after a predetermined amount of time, said timer being set by said first server host or said client host.*

However, in an analogous art, Zilliacus further discloses:

enabling the client host to request and download additional code as needed (e.g., additional code as either time-based or transaction-based implementation code, col.3: 54-61; col.4: 9-19); and

implementing at the client host a timer for deleting said first software after a predetermined amount of time (e.g., col.3: 62 – col.4: 5; col.4: 20-29; col.6: 23-29),

said timer being set by said first server host or said client host (e.g., col.9: 11-18; col.3: 54-61; col.4: 9-19).

It would have been obvious to a person having ordinary skill in the art at the time the invention was made to combine Zilliacus' teaching into Tompkins' teaching. One

would have been motivated to do so to obtain applications on an as needed basis and/or free memory space for new applications as suggested by Zilliacus (e.g., col.9: 11-18; col.3: 34-43; col.6: 53-63).

Claim 2:

The rejection of claim 1 is incorporated. Tompkins also discloses *downloading the first software from the first server host dynamically, as needed, by the client host* (e.g., col.3: 51 – col.4: 65; col.2: 41-60).

Claim 3:

The rejection of claim 1 is incorporated. Tompkins also discloses *the client host initiates the downloading when it determines that it needs the first software to interact with the first server host* (e.g., col.4: 12-65; col.5: 1-63).

Claim 4:

The rejection of claim 1 is incorporated. Tompkins also discloses *downloading the first software as at least one object using at least one specialized class loader* (e.g., col.6: 18 – col.7: 59).

Claim 5:

The rejection of claim 1 is incorporated. Tompkins also discloses:
establishing a session with a second server host; and downloading second software from the second server host for use during the session therewith to implement a client side of a second version of the first network application that differs from the first version (e.g., col.2: 41 – col.3: 23; col.5: 64 – col.6: 17);
wherein the second software is compatible with software executed at the second server host to implement a server side of the second version of the first network application (e.g., col.3: 51 – col.4: 65; col.6: 18 – col.7: 59).

Claim 6:

The rejection of claim 5 is incorporated. Tompkins also discloses *the sessions with the first and second server hosts overlap, at least in part* (e.g., col.5: 1-63; col.3: 46 – col.4: 11).

Claim 7:

The rejection of claim 1 is incorporated. Tompkins also discloses:

establishing a session with a second server host; downloading second software from the second server host for use during the session therewith to implement a client side of a second network application that differs from the first network application (e.g., col.3: 51 – col.4: 65; col.6: 18 – col.7: 59);

wherein the second software is compatible with software executed at the second server host to implement a server side of the second network application (e.g., col.2: 41 – col.3: 23; col.4: 12-65).

Claim 8:

The rejection of claim 1 is incorporated. Tompkins also discloses:

establishing a further session with the first server host; downloading second software from the first server host for use during the further session to implement a client side of a second network application that differs from the first network application (e.g., col.5: 1-63; col.3: 46 – col.4: 65);

wherein the second software is compatible with software executed at the first server host to implement a server side of the second network application; and the session and further session with the first server host overlap, at least in part (e.g., col.2: 41 – col.3: 23; col.6: 18 – col.7: 59).

Claims 9-14:

Claims 9-14 are program storage device versions, which recite the same limitations as those of claims 1-8, wherein all claimed limitations have been addressed and/or set forth above. Therefore, as the references teach all of the limitations of the above claims, they also teach all of the limitations of claims 9-14.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. Any inquiry concerning this communication should be directed to examiner Thuy Dao (Twee), whose telephone/fax numbers are (571) 272 8570 and (571) 273 8570, respectively. The examiner can normally be reached on Tuesday, Thursday, and Friday from 6:00AM to 6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tuan Q. Dam, can be reached at (571) 272 3695.

The fax phone number for the organization where this application or proceeding is assigned is (571) 273 8300.

Any inquiry of a general nature of relating to the status of this application or proceeding should be directed to the TC 2100 Group receptionist whose telephone number is (571) 272 2100.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should

Art Unit: 2192

you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
